

## ON-SITE FUELING

At Midwest Fuels we provide on-site fueling directly into trucks and equipment for the construction and transportation industries. This service allows the customer to have fueling performed on their property or construction site without the need for costly tanks and dispensing equipment, saving valuable time and dollars. Call today and discover how Midwest Fuels' On-Site Fueling Program can help you increase profits and fleet productivity.

On-Site Fueling creates many customer advantages:

- ✓ Increase your fleet's efficiency
- ✓ Turn time spent refueling into productive, profit generating, on the job time
- ✓ Eliminate drive time to refueling sites or truck stops
- ✓ No more waiting in line at the pumps
- ✓ Full utilization of driver's hours of service
- ✓ Fleet equipment starts everyday ready to go

Midwest Fuels' On-Site Fueling Service will help you realize an increase in fleet efficiency, productivity and bottom line profits by eliminating non-productive labor and equipment operating time.

Midwest Fuels will refuel your fleet or equipment during your off-duty hours. When your drivers and operators report for work at the beginning of a shift the vehicles are ready to go. Unproductive time spent traveling to the fueling site and waiting in line at the fuel pump is eliminated and converted to productive profit generating time on the job. Time is money.

In addition to the savings realized by increased efficiency and productivity the need for expensive storage tanks and dispensing equipment is eliminated freeing valuable business capital. Your only fuel inventory investment is in the fuel tanks of your fleet. Fuel shrinkage and misuse of company credit cards is eliminated.

To assist you in your record keeping and cost analysis Midwest Fuels will provide you with an easy to read delivery receipt each time we refuel your fleet. The delivery receipt will show the date and time of delivery, your vehicle identification number and the gallons delivered into each vehicle.
